Contra Costa Health Services – COVID-19

For more information and latest updates, please visit the Contra Costa Health Services website at <https://cchealth.org/>.

Booster Shots Media Release

Contra Costa Health Services (CCHS) and its community health partners are committed to ensuring safe, efficient and equitable access to COVID-19 booster vaccines for all eligible county residents.

COVID-19 vaccines have proven to be highly effective at preventing infections and serious illness from the virus, including the delta variant. As with most vaccines, that protection reduces over time.

That is why the Centers for Disease Control & Prevention (CDC) and the California Department of Public Health (CDPH) recommend that certain groups of people who completed a two-dose series of Pfizer's COVID-19 vaccine to receive a booster dose of Pfizer six months afterward or later.

People previously vaccinated with the Pfizer vaccine who should receive a booster, according to the CDPH, include:

- those who are 65 or older
- residents of long-term care facilities
- those who are 50 to 64 with underlying medical conditions or who are at increased risk of severe COVID-19 due to social inequities, including those from communities of color

People previously vaccinated with the Pfizer vaccine who may consider receiving a booster, based on their individual benefits and risks, include:

- those who are 18 to 49 with underlying medical conditions
- those who are 18 to 64 and at increased risk of exposure to COVID-19 due to their occupation or institutional setting

Booster doses of vaccine are not currently recommended for others, including people who received Moderna or Johnson & Johnson (Janssen) vaccine. CCHS will promptly post updates at cchealth.org/coronavirus as more information becomes available.

The best place for most Contra Costa residents to seek COVID-19 vaccine is through their own healthcare providers or their local neighborhood pharmacies. COVID-19 vaccine is now plentiful, and CCHS is in regular communication with community healthcare providers, clinics and pharmacies to ensure that all eligible residents can access vaccine.
